ABSTRACTED-PUB-NO: KR2003072311A

BASIC-ABSTRACT:

NOVELTY - A system and a method for computerizing garbage bag distribution are provided to remotely manage a tool, which can confirm the separated disposal, a volume, and sale for a garbage bag printed a barcode, through the Internet or a PDA(Personal Digital Assistant).

DETAILED DESCRIPTION - A main server(1) includes the recognition information, and the information for delivery, warehousing, moving, sales, and gathering. A sub server(2) examines and analyzes the garbage volume for each region by recognizing the barcode attached to each garbage bag. A management server(3) knows the sales and the stock of each garbage bag. A transmitting tool(4) confirms a normal circulation of the garbage bag by confirming the barcode through the Internet or the PDA. A management system manages the garbage bags

from the sales to the gathering in a remote place through the Internet or the network.
